# BANIMAL /// MONOCHROME

The Banimal range is Monochrome and this is why:

**Broad Appeal:** Monochrome colors like black, white, and gray are timeless and have a broad appeal. They are suitable for both boys and girls, making them a versatile choice for parents who prefer gender-neutral clothing.

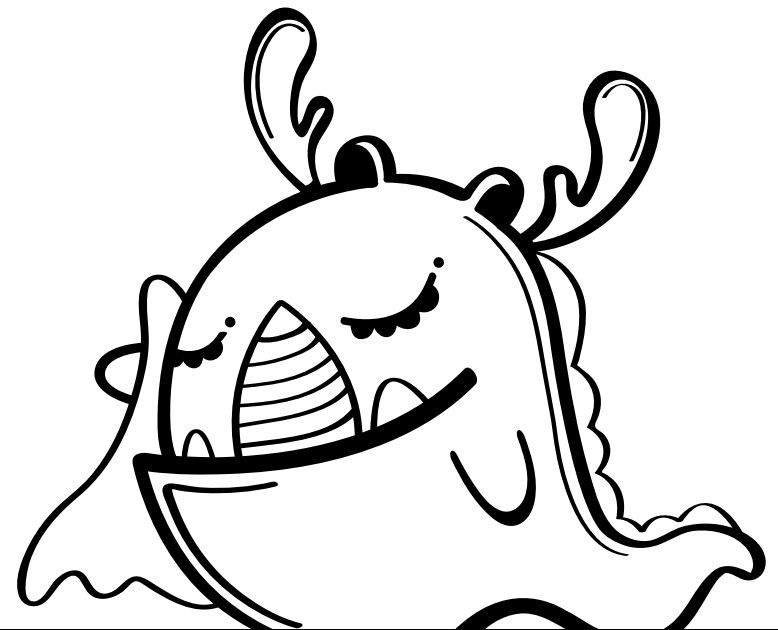

**Timeless Style:** Monochrome colors are classic and never go out of style. They offer a clean and modern look that many parents appreciate, making them a popular choice for baby clothing.

**Photography and Social Media:** Monochrome babygrows can make for great photoshoot outfits. Their simple and stylish look can stand out in photos, making them popular among parents who like to share their baby's photos on social media.

**Giftability:** Monochrome babygrows are a popular choice for baby shower gifts or new baby gifts because of their timeless appeal and gender-neutral design. They are a safe choice for gift-givers who may not know the baby's gender or the parents' style preferences.

**Versatility:** Monochrome babygrows are easy to mix and match with other clothing items, allowing parents to create various outfit combinations.

**Easy to Coordinate:** Monochrome babygrows can be easily coordinated with other accessories and items, such as hats, socks, and blankets. This makes them a convenient choice for parents who want to create a cohesive look for their baby.
